FULL-STACK SOFTWARE ENGINEER

An enthusiastic, bilingual, software engineer with run-through-the-wall energy that brings a good, positive vibe to any professional atmosphere. Experience with Full-Stack development using React.js, Javascript, and Ruby on Rails to create ideas and collaborate with others on making those ideas reality.

TECHNICAL SKILLS

Javascript , React.js, Ruby on Rails, CSS , HTML, Git/Github, ActiveRecord, postgreSQL

TECHNICAL PROJECTS

AI Assistance- [Github](#) | [Demo](#)

Login for AI personalities with a web implementation of an AI assistant that manipulates a 3D object
- Used React and Rails to make an Alexa-like AI that replicates having an assistant based on Jarvis from Iron Man
- Manipulated Sessions and Cookies to keep the AI from re-rendering
- Pioneered the front end using Openai API chatbot to replicate Alexa
- Learned Three.js to make a 3D cube to stand-in for lightbulb that the AI can manipulate
- Implemented React-Router 6 to make navigation hooks to remove clutter and keep the user experience clean

Flatbook - [Github](#) | [Demo](#)

A React project of a spin on Facebook with follow/unfollow, marketplace, news feed
- Used Next.js to create a "Facebook" clone with front-end functionality
- Made fetches to access db.json data and rendered it to be very easy and user friendly
- Utilized state to make a follow and unfollow button, and a functional block system
- Integrated TailwindCSS to replicate the styling of FaceBook
- Incorporated NewsData API to render a feed page with global news

Video Game - [Github](#) | [Demo](#)

16-bit storytelling / player choice video game with stats to dictate success based on choice
- Utilized Ruby join tables connections to make methods to create interactions for video game concept
- Displayed a 8-bit video game using React to style the page using CSS
- Lessened the fetch load by using sinatra routes and fetches and manipulated what to render

EXPERIENCE

A.Duie.Pyle   Greencastle, Pa
Dock Worker   03/2022 - 07/2022
- Collaborated with 15 dock workers to unload trailers and move items to warehouse for distribution
- Devised ways to efficiently and safely unload trailers that were not properly loaded or secured by sender
- Utilized document management system to track freight shipment locations throughout the terminal

The Orchards Restaurant   Waynesboro, PA
Server   07/2021 - 02/2022
- Maintained positive interactions with customers that led to repeat business and "regulars" for the restaurant
- Implemented restaurant's 10 steps of service guidelines to maintain high level of customer service
- Used point of sale system to enter customized customer orders, table locations, and payments

EDUCATION

Flatiron School   NYC, New York
Full Stack Web Development, React, Ruby on Rails and JavaScript program   01/2023

Waynesboro Area Senior High School   Waynesboro, Pa
High School Diploma   03/2021
GPA 3.9, President's Education Awards
